TRAN THANH DAT

JUNIOR DEVOPS ENGINEER

Hanoi, Vietnam | tranthanhdat4321@gmail.com | 0984 427 144 | github.com/IntheNameOfGOD2806

PROFESSIONAL SUMMARY

Junior DevOps Engineer with hands-on experience supporting enterprise on-premises Red Hat OpenShift/Kubernetes platforms, CI/CD workflows, and observability. Skilled in troubleshooting workloads and service traffic across segmented networks, and in integrating Prometheus, Grafana, Loki, Grafana Alloy,...etc. Prior software development experience supports effective collaboration with development teams and practical incident diagnosis.

TECHNICAL SKILLS

Containers & Platforms: Linux, Red Hat OpenShift, Kubernetes, Docker, Rancher, OpenShift Virtualization
CI/CD & Automation: GitLab CI/CD, Terraform, Ansible, Helm
Observability: Prometheus, InfluxDb, Grafana, Loki, Grafana Alloy, Alertmanager, EFK stack
Networking & Services: Nginx, Ingress/Routes, DNS, TCP/IP, SFTP, REST APIs
Languages & Scripting: JavaScript, TypeScript, Bash
Cloud : AWS(ECS,EKS,Fargate,ECR,...)
Software Development Skills: ReactJS, NextJS, ExpressJS

PROFESSIONAL EXPERIENCE

ETC Technology Systems JSC | Hanoi, Vietnam *May 2026 - Present*
DevOps Engineer | ***VETC Electronic Toll Collection (Department for Roads of Viet Nam)***

- Support operation and troubleshooting of on-premises Red Hat OpenShift environment hosting containerized services and virtual machines; use CLI tool to inspect nodes, workloads, Services, Routes, events, logs, and resource state.
- Investigate end-to-end traffic across DMZ, Internal, and Database zones, validating DNS, TCP ports, Service/NodePort/Route exposure, proxy paths, firewall reachability, and kubelet connectivity from Linux and Windows hosts through bastion access.
- Configure Databases metrics collection on Windows/Linux Server/K8s workload with Grafana Alloy/Telegraf, integrate it with InfluxDb/Prometheus and Grafana, build monitoring coverage for connections, deadlocks, memory, and I/O,...
- Containerized web applications with Docker and configured Kubernetes manifests, Helm values, Nginx, Ingress, ConfigMaps, Secrets, and image registry access for staging and production releases.
- Built and maintained GitLab CI/CD workflows for containerized applications deployed to Kubernetes environments, standardizing image build and release steps.
- Set up High-Availability Redis Sentinel and Kafka clusters across servers's environments

BKAV Corporation | Hanoi, Vietnam *Dec 2024 - Apr 2026*
Software Engineer / DevOps | ***Public Service Portal & AI Smart Meeting***

- Built and maintained GitLab CI/CD workflows for containerized React/Next.js and Node.js applications deployed to Kubernetes environments, standardizing image build and release steps.
- Containerized web applications with Docker and configured Kubernetes manifests, Helm values, Nginx, Ingress, ConfigMaps, Secrets, and image registry access for staging and production releases.
- Troubleshoot CrashLoopBackOff, ingress error, CORS, RBAC, image pull, reverse-proxy, and container networking issues; coordinated with backend teams to stabilize deployments.

PERSONAL PROJECT

Self-Managed Kubernetes Cluster on AWS | ***Personal Infrastructure Project***

- Provisioned AWS networking and EC2 infrastructure with Terraform, bootstrapped Kubernetes with kubeadm, automated host configuration with Ansible, and integrated ECR, Kong gateway, Prometheus/Grafana, and EFK stack
